Letter of Recommendation

I am pleased to write this letter for one of my most exceptional student, Ms. Annanya Pingale, who aspires to pursue a Master's program at your esteemed University. I have known her as a student with exemplary analytical skills, sound technical knowledge, and impressive interpersonal relationships.

As the Head of the Department of Biomedical Engineering and her professor, I saw her progress and drive to excel in her academics. The term when I taught her the subject of Biomedical Instrumentation-I. She scored the highest marks in the subject that semester. During her course, I have assessed her based on her academics and her performance in lab sessions. Annanya showcased great learning potential as she quickly grasped topics such as modes of ventilation, different types of ELISA testing, and concepts of hemodialysis. What comes to mind when I think about her capabilities is her strong rational and logical reasoning skills, which she demonstrated time and again through her coursework. Owing to her academic excellence, she maintained a CGPA of 8.7/10. She has always been a top performer in all the practical sessions, pertaining to blood cell counters, Physiotherapy equipment, and working of hemodialysis and further. I believe that her stronghold over fundamental concepts along with a penchant to expand her knowledge further would eventually propel her to establish a successful career.

Additionally, Annanya showcased a multifaceted persona when she volunteered to be a part of the sports and publicity team of the Student Council. Being a part of this team, she took great enthusiasm in coordinating with the team to conduct various events. Moreover, as she was the General Secretary of the "Biomedical Engineering Society of India" committee of our college, she headed a team of more than 30 students guided them through, and conducted many workshops and seminars for the department. During her tenure she even organized IMPULSE, the Biomedical department's technical festival, she was actively involved in managing the whole festival with her gracious leadership and managerial skills. Currently, she is associated with the committee as the student advisor, she is a gallant leader who always steps up when required, but also inspires others to take initiative. She is an outstanding communicator, clear in her opinions and expressions.

Annanya is certainly an extraordinary candidate for graduate study and the industry. Given the proper context and vigorous academic milieu at your esteemed university, Annanya should be able to make the best use of opportunities to create a niche for herself. I am absolutely confident that the Master's Program your revered university offers will immensely benefit her and will significantly contribute in shaping her career. I most strongly recommend her for the program with all my best wishes.

Dr. Jitendra Toravi

M.Tech., Ph. D. (Biomedical Engineering), IIT Bombay

Professor & Head,

Department of Biomedical Engineering (NBA Accredited)

Vidyalankar Institute of Technology, India
